SUMMARY

Computer Science undergraduate with robust backend development expertise. Proficient in architecting reliable systems utilizing Java and Spring Boot. Experienced in engineering RESTful APIs, optimizing database queries, and deploying production-ready, full-stack applications to ensure seamless user experiences.

EDUCATION

Medicaps University

B.Tech in Computer Science and Engineering; CGPA: 8.91/10.0

Indore, MP

Aug 2022 – May 2026

SKILLS

Languages: Java, JavaScript, SQL, C++, HTML, CSS

Frameworks: Spring Boot, Spring MVC, React.js, Tailwind CSS, Bootstrap

Concepts: Object-Oriented Programming (OOP), REST APIs, Web Sockets

Tools & Platforms: MySQL, Git, GitHub, Postman, Firebase

INTERNSHIP EXPERIENCE

Palo Alto Networks - InHouse Virtual Internship

Cybersecurity Virtual Intern

Jun 2025 – Jul 2025

- Analyzed 5,000+ firewall logs to identify and mitigate anomalous network traffic, improving threat detection efficiency.
- Configured NAT policies and firewall protocols, strengthening enterprise security against common network vulnerabilities.
- Executed multi-layered threat prevention strategies, blocking 10,000+ malicious requests during simulated scenarios.

PROJECTS

Project Management System | Spring Boot, MySQL, JWT, React.js

- Architected and deployed a full-stack management system supporting project tracking, reducing manual task overhead by 40%.
- Established secure REST APIs with Role-Based Access Control (RBAC) utilizing Spring Security and JWT for 100+ simulated users.
- Integrated Razorpay for seamless transactions alongside Gmail SMTP for automated asynchronous email notifications.

Video Streaming Platform | Spring Boot, MySQL, React.js, HLS

- Engineered a backend streaming application supporting adaptive bitrate playback up to 1080p for optimized user viewing.
- Optimized video chunking via HTTP Live Streaming (HLS), reducing media delivery latency by 35% and buffering by 20%.
- Designed a responsive React.js interface that dynamically displays video metadata, accelerating page load times by 1.5 seconds.

AI Mock Interview Platform | React, Tailwind, Firebase, Generative AI

- Programmed a fast and responsive interview simulation platform generating context-aware questions with sub-second response times.
- Incorporated Google Gemini AI via REST API to evaluate user answers and generate detailed feedback reports for 50+ mock interviews.
- Deployed secure user session management leveraging Firebase Authentication, ensuring a reliable and protected user experience.

CERTIFICATIONS & ACHIEVEMENTS

- **Competitive Programming:** Achieved **Guardian** status on LeetCode (Top 2% globally), solving 500+ problems.
- **Job Simulations:** Successfully completed Software Engineering (**Accenture**) and Cybersecurity (**Deloitte**) virtual simulations.
- **Certifications:** Completed the **Microsoft** Software Development Lab and **Palo Alto Networks** In-House Virtual Internship.
- **Hackathons:** Ranked in the Top 25% of the **Amazon** Hackathon Challenge.
- **Competitions:** Cleared the 1st round of the **Naukri Campus** Young Turks assessment.
